

Granite curbing is a valuable investment for any municipality or property owner looking for a long-term, reliable solution. Polycor's inventory of North American granite ensures that each project is supplied for success.

Using granite is the optimal choice for a variety of commercial, public or civic applications due to the wide range of functional benefits it offers. Not only does granite curb offer long-term visual appeal, its composition and durability make it ideal for various street designs that range from small to large-scale projects.

Polycor's impressive inventory from our North American quarries and manufacturing facilities ensures that every project – no matter the size – is equipped with quality resources. As a municipality or property owner interested in investing in durable and reliable curbing, granite curbing provides an excellent return on investment.
